#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

1. Claims 1-13 are presented for examination.

### *Priority*

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### *Claim Objections*

3. Claims 1, 6-8, 12 and 13 are objected to because of the following informalities:
4. The words "despatching" and "despatched" should be changed to "dispatching" and "dispatched" respectively.

Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-13 are rejected under 35 U.S.C. 102(e) as being anticipated by He, US Pub. No.2006/0155802 A1 (hereafter He).

As to claim 1, He discloses a method of discovery, by a device connectable to a communication network, of the other devices connected to this network, wherein it comprises the following steps:

connection of the device to the said network and despatching of an announcement message containing autodescription information describing the device destined for all the other devices connected to this network (sending an announcement message for service from a device to other device, see figs.3A, 4, [0106] to [0117] and [0150] to [0152]);

despatching of an autodescription information request message to all the other devices connected to this network and reception of a response message from each of the other devices of the network containing the autodescription information of this other device (sharing resources and information between devices, see [0118] to [0123]).

As to claim 2, He discloses that the request message and the announcement message are merged (see fig.12, [0165] to [0176]).

As to claim 3, He discloses the autodescription information describing a device contains the address on the network of the device (see [0119] to [0123]).

As to claim 4, He discloses that the autodescription information describing a device contains a unique global identifier, different from the address, identifying the device on the network (monitoring the global node message, see gih.6, [0131] to [0136]).

As to claim 5, He discloses the autodescription information describing a device contains the characteristics of a software module making it possible to control this device 9see [0137] to [0141]).

As to claim 6, He discloses that the announcement message is despatched by broadcasting over the network (see [0151] to [0156]).

As to claim 7, He discloses that the announcement message is despatched by multicasting on a predefined multicasting address to which the other devices must have subscribed (see [0151] to [0156]).

Claims 8-13 are rejected for the same reasons set forth in claims 1, 3-7 respectively.
